## LOCAL NEWS

Everett Bills combined crop is averaging 35 to 40 bushels per acre.

Mrs F. Asmussen has had her house remodelled and is now having it decorated.

Mr. and Mrs. J. G. Harrison arrived home on Tuesday from their trip to England.

B. F. Kieran has purchased the dwelling recently vacated by Mr. and Mrs. C. L. Anderson, and will move into it shortly.

Mrs Ida M. Hall, returned over the week-end after spending the past five months visiting relatives and friends in the Eastern States.

Showers over the weekend held up harvest operations, but the early cutting got under way again by the middle of the week. A little grain has been brought in and the elevators are shipping it out as fast as they can gather a car-load. So far the samples are good, both in yield and grade and the district should average a fair average crop.

We have heard talk again lately about the old-old perennial, a sewer along the alley at the rear of the front street. Every once in a while this has been coming up just about as far back as one can remember, but very little has been done about it. A project of this size is not one for the council to decide, but they be compelled to do much about it, unless the citizens concerned do more than talk about it. Other villages of our size are doing things along this line and this village will have to do something if it is going to keep abreast of the times. This talked-of sewer would at least be a start in the right direction, and while it would only serve those near it could eventually become the main sewer and others could be built connecting on to it. One problem it would solve, and that is the matter of a ladies rest room, another long-time subject on the street corner which has never been solved. Undoubtedly our greatest public need and if we could kill two birds with one stone that would be further incentive to push it. All it needs is for one or two public-spirited business men to circulate a petition, find out who would be in favor of it, and from them on it would be up to the council to gather the needed facts and figures.

## HELP THEE FARMER

E. B. Martin of the Extension Service of the Department of Agriculture for the province says that few Alberta farmers who have electricity available make full use of it in spite of the fact that more kilowatt hours used the less it costs for each kilowatt hour of energy.

The number of ways in which electricity can be used on a farm is almost unbelievable. Mr. Martin estimates that of the 300 or so that are in use at any time to time, 75 can be put to practical use on the average farm in this province. They will pay for themselves again and again in time and labor saved. At a cost of \$100 for installation and another \$600 for equipment, an average farm electrification unit represents an investment of \$1200. That \$1200 investment should be turned into a profit of \$1000.

Mr. Martin cites as an example the case of two neighbors, both with the same source of power. One of them uses his electricity merely for lighting in the house. He consumes 20,000 watts per hour in an average month. His bill is \$5.50. His neighbor who has an electric motor on the pump, a pig brooder, a hot plate, a quarter horse stall, a portable on the farm, nail-mill and bench sander, plus full lights in the house, barn, pigsty, pump house, granary and shop. He uses 90,000 watts in an average month. He has a bill of \$5.50, the minimum plus 70 kilowatt hours at two cents or \$1.40 to give a total of \$6.90. For all the additional energy the cost to the farmer has been 40 per month.

Mr. Martin will be pleased to offer suggestions on the use of electricity on the farm and to receive inquiries with reference to other uses of farm electrification. Address your letter to E. B. Martin, Extension Agricultural Engineer, Alberta Department of Agriculture, Edmonton.

## Road Program in High in District

All councillors were present at the regular meeting of the Council of the Municipal District of Mountain View on Monday, September 8th and considerable business occupied the time of the councillors throughout the day.

Council approved the application of the Calgary Power Company to place a pole line one foot from the fence line west of the south west of 19-33-27-A to serve the Mountain View.

A communication was received from the Prairie Farm Assistance Branch, explaining that to qualify for assistance any one township must have an average yield of 30 bushels per acre, eight bushels per acre. Council were of the opinion that no township within the municipality would qualify for assistance this year.

A communication was received from the Department of Public Works dealing with the crossing of railroads by old roads and advised maintenance men to stop after crossing a track with machinery and see that all flangeways were clear. When crossing a road, a person should be advised so that he can inspect the track immediately after the crossing has been made.

Approval was given to W. H. Dillabough for the establishing of a farm machine and car repair shop a mile and a half east of Bottrel. Construction of a road diversion located on the south west corner of the S.W. of 22-34-4-5 was also approved.

A communication from the Royal Legion, A.P.U. was received in connection with a bridge on the S.E. of 22-31-8-5. Another communication was received from the Department of Public Works concerning the same bridge and advising that due to shortage of materials it was doubtful if a new bridge could be constructed on this location, this summer.

Department of Public Works advised Council that an additional grant of \$2200 had been approved for placing gravel on municipal roads.

In reply to an order placed by the municipality for a snow plow for one of the motor patrols, the machine company stated that delivery could be expected sometime in September.

The Municipal Inspectors report showed that the local municipal office was being operated in a very

The Olds School of Agriculture was a busy place on Thursday, September 4th, as 8 Grade clubs of the southern part of the province vied for the honor of competing in the junior club judging finals in Edmonton on Friday.

In the first judging contest, there were three classes judged: 1st a class of Angus cattle; 2nd, a class of Angus breeding heifers; 3rd, a class of Shorthorn breeding cows all of which had calves.

Judges in this competition were Fred Newcombe, Edmonton and Bill Meadie of Olds. The results of the competition were:

1st class of Angus cattle: Dan Bradshaw, Carl Desmond Jones, Dick Brown, Lethbridge, Lyle Murray, John Holmes, Carson, Stanley Bell, Harold Schleicher, Dan Bradshaw, Jim McLean, Clarence, Jean Manser, Herb Mowat, Innisfail, David Bradshaw, Bud McBride.

2nd class of Angus breeding heifers: Dan Bradshaw, Jim McLean, Carl Desmond Jones, Dick Brown, Lethbridge, Lyle Murray, John Holmes, Carson, Stanley Bell, Harold Schleicher, Dan Bradshaw, Jim McLean, Clarence, Jean Manser, Herb Mowat, Innisfail, David Bradshaw, Bud McBride.

3rd class of Shorthorn breeding cows: Dan Bradshaw, Carl Desmond Jones, Dick Brown, Lethbridge, Lyle Murray, John Holmes, Carson, Stanley Bell, Harold Schleicher, Dan Bradshaw, Jim McLean, Clarence, Jean Manser, Herb Mowat, Innisfail, David Bradshaw, Bud McBride.

FOR SALE—Cook car on steel wheels, 10x12 feet, built in cupboards and bunks. \$350.00. L. B. Beddoes, phone 67, Crossfield.

FOR SALE—New brown enamel Circulating heater. Good as new \$25.00.

## IN MEMORIAM

In loving memory of Dad, James R. O'Neill who passed away July 31, 1944. What would I give to clasp his hand. His happy face to see. To hear his voice and see his smile. That meant so much to me. Sadly missed by your wife & family

## Soil Conservation

**THE QUESTION OF SOIL CONSERVATION** in Canada has taken on growing importance recent years. The abundance of good land, and the general high fertility of the soil did not lead those who came to open up the country's great farming areas to think seriously of soil conservation. It is now apparent, however, that to retain the fertility of the soil in many parts of the country is becoming a very grave problem. It is disturbing to contemplate the possibility of many of Canada's rich farming districts some day becoming waste lands, but there is apparently real danger of such a situation occurring if successful methods of soil conservation are not practiced.

### Soils Experts Give Warning

Dr. J. L. Doughty of Swift Current, officer in charge of the Dominion Soils Research Laboratory, said recently at a meeting of agricultural scientists from various parts of the Dominion that "soil conservation is sounding the death knell of prairie agriculture". He pointed out also that eighteen per cent. of the nitrogen and twenty per cent. of the organic matter has been lost to the brown soils of the prairies since they were first cultivated. Reasons for these losses were said to be such factors as fallow, hail, frost, rust, insects and new varieties of grains. It was impossible, the group was told, to estimate the single effect of any of these causes.

### Is Important To Farmers

Dr. P. O. Ripley of the field husbandry section, Dominion Department of Agriculture, spoke of soil erosion, and said that water erosion was becoming a very serious problem. It was recommended that a thorough investigation of soil erosion under varying climatic conditions should be made in locations where the need was evident. Dr. G. N. Ronkne, of the Ontario Agricultural College, Guelph, discussed the value of fertilizers in soil conservation, and said that they should not be regarded as temporary measures, but as a permanent factor in preserving the fertility of the soil. These scientists have added their warnings to those of many other agriculturists and geologists who are constantly drawing attention to the need for continued action in the matter of soil conservation. Much is now being done through the P.F.R.A., Dominion and Provincial Departments of Agriculture, and agricultural organizations, but it is clear that the problem is one of which each farmer should be thoroughly aware, and in which he should co-operate in every possible way with those who are endeavoring to solve it.

### Powder Reduces Electrical Shock

Static reducing powder, that can be blown into automobile inner tubes, lessens the electrical shocks that sometimes occurs when a car is touched and also the electrical interference with radio reception. The powder clings to the walls of the tube and changes the electrical behaviour of the tires—Scientific Service.

### Both Work And Worry

Prominently posted on the wall of a business establishment, in this house of advice: "Work hard only for eight hours a day and don't worry; then in time you may become both and work 18 hours a day and have all the worries."

FOR MODERN PEST CONTROL

WANTS ARCTIC RADAR—Gen. Ira C. Eaker of the U.S. army air forces urges a radar "fence" along the Arctic circle to protect the United States from a possible northern attack.

### FUNNY AND OTHERWISE

The minister had come to call and was holding the small boy of the house on his lap.  
"So, you can count, eh?" he said to the youngster. "Well, let's hear you."

The lad met his request with alacrity: "One, two, three, four, five, six, seven, eight, nine, ten, king."

An attendant in an Aberdeen cleaners and a ten-shilling note. She took it from the manager.

Later the following notice was screed:

"A 10s note has been found in cinema... Will the owner please queue up at the box office at 10 a.m. tomorrow."

Doctor—"You are suffering from indigestion. Drink a glass of hot water every morning."

Patient (startled)—"I have been here for months, doctor, only my landlady calls it coffee."

Patient (in waiting room of doctor's office): "How do you do?"

Second Patient: "So-so. I'm aching from neuritis."

First Patient: "Glad to meet you. I'm Mendelssohn from Chicago."

A certain minister, while preaching, said that every blade of grass was a sermon. The next day he was amusing himself by mowing his lawn when a country yokel asked him, "What's the right way to cut a lawn?"

Attendants feed the fish on small crappie fry and because it is taking life so easy—no competition at meal times—it's getting fat.

If the fish were to be placed with other fish the same size or larger than itself they would kill it. On the other hand if it were placed with smaller fish than itself it would kill them.

To avoid such a happening the attendants have exiled the fish to a trough where it lives in solitary grandeur.

This type of "freak fish" while comparatively rare, does appear in the fry stage now and again, but generally never reaches the age or size of the present one.

### Calgary's Pet Freak Is Two-Headed Trout

CALGARY.—A two-headed speckled trout raised in the hatcheries of a Calgary brewery continues to baffle its attendants—even if it is living on borrowed time.

Now 15 months old the pet freak is expected to continue to live the rest of its life as an ordinary trout.

The fish rests and swims on its side, and though it is not as agile and swift as a normal trout, it is able to get about with fair facility. Through the second head of the trout is not used by the fish for eating, it has eyes and breathes normally.

Attendants feed the fish on small crappie fry and because it is taking life so easy—no competition at meal times—it's getting fat.

If the fish were to be placed with other fish the same size or larger than itself they would kill it. On the other hand if it were placed with smaller fish than itself it would kill them.

To avoid such a happening the attendants have exiled the fish to a trough where it lives in solitary grandeur.

This type of "freak fish" while comparatively rare, does appear in the fry stage now and again, but generally never reaches the age or size of the present one.

### Woman Tourist Was Very Lucky

A search through her purse for a nickel in a phone booth at a hotel in Fort Erie, Ont. almost cost a woman her life. A woman who refused to give her name, was searching through her purse in a public telephone booth when a diamond bracelet and two diamond rings dropped from her bag. She got away scot-free.

Only after noticing her loss, and hurriedly made her way back to the hotel. In the meantime, a guest giving his name as Jack Bell of Toronto turned the gems into a room clerk. She left a \$10 reward for bell.

Mary is only one-tenth as heavy as the earth.

### THE TILLERS

## Indians Want More Pay At Stampede

CALGARY.—Many people who still consider Indians to be savages and wearing feathered headdresses were considerably jarred at the commercial attitude they adopted toward the Calgary Stampede. They asked for a pay increase.

Representatives of the Blackfoot, Sioux and Santees tribes in a formal resolution asked that the prize list be doubled for best dressed Indians, parade participants and Indian races. Teepee grants should be raised from \$50 to \$100, it was added.

The resolution was signed by such colorful figures as Head Chief Duck, Chief Many-Bears and John Powderface.

During the recent stampede, Indians received \$1 a head for every person who attended, while the chiefs received \$5. They also were paid for competing in horse races and were given a freight allowance.

Each day they received 1,000 pounds of flour, 500 pounds of bread and tea and sugar as required.

Hay was provided for the 100 horses they brought along. In addition they received cash prizes and other gifts from commercial institutions and amateur photographers.

Stampede officials estimate that the total cost of keeping the Indian tribes in Calgary for Stampede week was approximately \$4,000. However, the tribes feel they have "helped greatly to raise the show to its present high standard" and they should share in increased net profit.

Famous Singer's Father Showed Good Judgment

In the heyday of her fame, Mary Garden, the opera singer, poured out her wealth lavishly. She was particularly generous with her father.

She insisted that no matter how much money she sent him, he was always asking for more. Nevertheless she did not question his wants, but gave him all the money he desired. Came the great stock market crash. When Mary's father died in the crash, Miss Garden appealed to her father for aid. He strongly enough refused. The singer was deeply disappointed, but she managed to weather the storm for a few years. After her father passed away, and her own astonishing fact was revealed. He had saved every dollar Mary Garden had bestowed upon him, and bequeathed it to her. He had often begged her to save her money in days of prosperity, but she had disregarded his plea, so he had saved her money for her!

The man confessed breaking into a house "around eight o'clock," police said.

Burglary of a dwelling at night carries a minimum term of three years. The minimum for daylight burglary is one year.

Police asked the weatherman what time the sun set that day and were told 7:47. Under the law, night starts an hour after sunset, so the charge was daytime burglary.

### Sentence Was Cut By Weatherman

GREEN BAY, Wisconsin.—Consultation of weather bureau records at Green Bay, Wisconsin, saved a convicted burglar from an additional two years in the state prison.

The man confessed breaking into a house "around eight o'clock," police said.

Burglary of a dwelling at night carries a minimum term of three years. The minimum for daylight burglary is one year.

Police asked the weatherman what time the sun set that day and were told 7:47. Under the law, night starts an hour after sunset, so the charge was daytime burglary.

### GEMS OF THOUGHT

#### READING

Reading serves for delight, for ornament, for ability. The crafty condemn it; but the simple admire it; the wise use it—Bacon.

You may glean knowledge by reading, but you must separate the chaff from the wheat by thinking—Oscar Wilde.

We should accustom the mind to keep the best company by introducing it only to the best books—Sydney Smith.

As you grow ready for it, somewhere or other, you will find what is needful for you in a book—George Macdonald.

Rightly to read and to practice the Scriptures, their spiritual sense must be understood—Mary Baker Eddy.

And behold, a certain lawyer stood up, and tempted him, saying, Master, what shall I do to inherit eternal life? He said unto him, What is written in the law? how readest thou? Luke 10:25, 26.

### ORGANIZED LABOR

About 180,000 honey bees are required to gather and prepare a pound of honey. Half fetch the nectar. Half wave their wings to evaporate the water off it and perform other hive chores.

BENNETT HEIR—H. A. Turner, resident of Vancouver, was bequeathed \$4,000 in the will of the late Vincent Bennett, not Morris Turner, Toronto. Mr. Harry Turner requested to say that he is not the recipient of the money.

### Nebraska Doctors Have New Theory About Baby's Food

CHICAGO.—Junior at six weeks is old enough to start eating meat, if you are guided by two Nebraska physicians who report successful results.

Dr. Ruth M. Leverton of Lincoln, Neb., and Dr. George Clark, Omaha, authored an article in the Journal of Pediatrics, reporting that the application of a meat diet presents itself to the pediatrician and parent as a concentrate source of high quality protein for supplemental feeding at an age when protein requirement, expressed on the basis of body weight, is at its highest.

In addition to feeding 18 six-week-old infants in Nebraska institutions, the doctors used 15 other babies as control patients, giving the usual baby diet without meat.

When compared with general babies who received strained meat routinely were more satisfied and slept better at night than did the control babies," they reported. "The pediatricians in charge of the children found all the children considered the babies in better physical condition as a result of receiving the meat supplement."

Each baby consumed an average of an ounce of strained meat daily, increasing the protein content of the infant's formula 25 per cent.

### Wild Horses Live On Sable Island

Once more Sable Island has lived up to its sinister reputation. Well it is named the Graveyard of the Atlantic. Any vessel that grounds off Sable Island is as good as doomed. Rarely does a ship so situated escape those shores unscathed. Not many people visit Sable Island unless they must in the course of duty. Those who have done so tell of the wild horses there. These are descended from survivors of one of the more than 200 wrecks that have gone up on the rocks of Sable in a site that went around were released safely.

They found rough grazing and fresh water and have bred there since the war. They are now prospering and afford proof of ability to survive under the most adverse circumstances.

### CARGO OF BIRBS

CARRYING cargo of birds, the 163-foot merchant schooner Morning Star VI sailed from the Marshall and Caroline Islands, whose natives have welcomed five similar ships from this port since 1856.

### WILSON'S FLY PADS

The cheapest and convenient way of getting rid of flies, now no longer when we use WILSON'S FLY PADS. Buy some today and let WILSON'S FLY PADS do the work for you. They have worked for Canadians since 1880. Still only 10¢.

### Delicious CRUMB COFFEE CAKE

#### Recipe

Add 1 envelope Royal Fast-Rising Dry Yeast and 1 teaspoon sugar to  $\frac{1}{2}$  cup lukewarm water, mix well. Add  $\frac{1}{2}$  cup milk, add 3 tablespoons shortening,  $\frac{1}{2}$  cup sugar and  $\frac{1}{2}$  teaspoon salt; combine well.

Stir in 2 cups flour, add 1 cup sifted flour to make a batter. Add yeast mixture and 1 beaten egg. Beat well. Add  $\frac{1}{2}$  cups water and  $\frac{1}{2}$  cup melted shortening. Cram 3 tablespoons butter or shortening, add 3 tablespoons sugar, mix well. Add  $\frac{1}{2}$  cup sized flour,  $\frac{1}{2}$  cup dry fine cake or bread crumbs, and  $\frac{1}{2}$  teaspoon cinnamon; stir until well mixed and add to the batter.

Grease a 9x13 inch pan with a soft dough. Knead lightly; place in greased bowl. Cover; set in warm place, free from draft, until double in bulk, about 2 hours. Roll out dough to  $\frac{1}{2}$  thickness and place in greased pan. Let stand at room temperature, free from draft, until light, about  $\frac{1}{2}$  hours. Prick top with fork and brush with a thin coating of melted shortening. Cram 3 tablespoons butter or shortening, add 3 tablespoons sugar, mix well. Add  $\frac{1}{2}$  cup sized flour,  $\frac{1}{2}$  cup dry fine cake or bread crumbs, and  $\frac{1}{2}$  teaspoon cinnamon; place on top of cake. Let rise again in warm place about  $\frac{1}{2}$  hour. Bake in moderate oven at 400° F. about 20 minutes.

ROYAL FAST-RISING DRY YEAST  
ACTIVATED YEAST

## WORLD HAPPENINGS BRIEFLY TOLD

Next Dominion convention of the Canadian Legion will be held in Saskatoon next May 23-27.

R.A.F. aircraft are to get back their pre-war marking of the red, white and blue circles on the wings.

The Province of Quebec recently paid the French Government \$4,728,000 in full to settle a loan contracted in 1894.

Women volunteers known as "Savage Sallys" call at each house in Hamptons borough once a week to collect waste paper.

Civilian employment in the United States mounted to an all-time high of 60,79,000 in July, the census bureau reported.

A woman in Holyoke, Mass., who received \$50 from the public welfare department in 1939 has returned the money—17 years later.

The local football club of Long Sutton, Lincolnshire, England, will dye its amber sweaters red because no team has ever won in them.

A group of 64 British architects and city planning experts, members of the Town and Country Planning Association of Britain, made a brief study tour of Sweden recently.

### Queen Victoria Wept At Son's Wedding

Last time there was a wedding of the hour to the British throne was when Edward, Prince of Wales married Princess Alexandra of Denmark in 1863. On that occasion Queen Victoria ordered that her son should be dressed "with the utmost magnificence" at St. George's Chapel, Windsor, usually known as the family chapel.

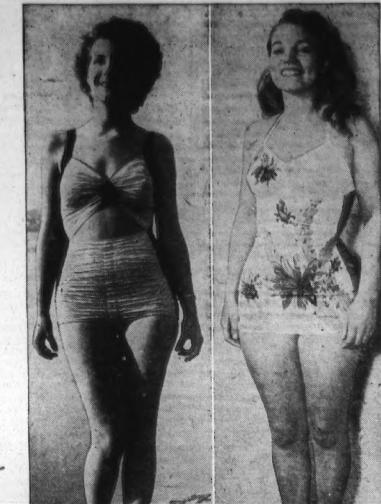

Dickens and Thackeray described the scene in ecstatic terms and Queen Victoria wept in her pew as Jenny Lind, the Swedish nightingale, sang at the marriage of the late Prince Consort. Said a contemporary reporter "the sight of her grief cast a momentary awe over the ceremony, which rendered the emotions of those present almost sublime."

### Good Definition Of Fault Finder

A Kansas country editor has discovered that when a man fails and writes to a newspaper to say "to one he hasn't an advertisement in it three to one he is a delinquent in his subscription, even money that he never did anything to assist the publisher to make it a good publication to which he can subscribe to see it when it comes out." To which might be added a 100 to one that he makes the biggest threats when he demands that his name be kept out of police court proceedings.

### OVER MILLION MILES

Harry Burns, 70-year-old veteran of 39 years' trucking, street railroading, hung up his conductor's cap for the last time. He said careless truck drivers and inebriates were his worst worry and estimated he travelled about 1,170,000 miles averaging better than 100 miles a day calling for a ladder and water,

PETERBORO'S BEAUTY QUEEN PROBLEM SOLVED—All's well in Peterboro, Ont., with Theresa Gosselin, (left), named "Miss Peterboro," and Mrs. Joyce Meiklejohn, (right), given the title of "Miss Peterboro District".

### HOW THE VICTORIA CROSS WAS WON IN CANADA OVER EIGHTY YEARS AGO

There is in Sydney, Australia, a started to extinguish the flames. No explosion occurred, and the train passed through without damage. O'Hearn's bravery was called to the attention of a Colonel Hannan, and as a result, the circumstances were brought to the notice of Queen Victoria, and an announcement of her award was made before the London Gazette of January 1, 1867.

The hero left Canada for India, from whence he moved to Australia and settled there. His exact fate was never known, but it is understood he was lost in a forest a few years later. Friends in Sydney erected a memorial.

It would appear that the Dominion Government, or the people of Danville, should erect one in that town.

### DIFFERENT NOW

Coal was looked upon as a nuisance in Europe as late as 200 years ago. No one thought of burning it, and while the coal seems to come to the surface, the hard lumps interfered with cultivation.

### IF TEMPERATURE FELL

A ten-degree drop in the temperature of the earth as a whole, would, in time, cover Canada, the Scandinavian countries, and much of the United States with great ice sheets.

## Health LEAGUE of CANADA

CERTIFIED MILK NOT  
ALWAYS SAFE

Opponents of milk pasteurization are still using the argument that certified milk—high grade milk from inspected herds which is produced under sanitary conditions—is as germ-free as pasteurized milk. Animals in certified herds are inspected twice a year for tuberculosis and other diseases.

However, these pasteurization opponents fail to point out that disease can occur in the period between examination and certification. They also point out that one diseased animal can infect an entire herd, certified or otherwise. For instance, it sometimes has been estimated that one in 200 negative tuberculin tests on cows is false therefore, if 10% of the approximately 300,000 cows in Canada were T.B. tested, this would mean that 19,500 were false negatives—and those 19,500 animals could produce a lot of disease-laden milk, and could pass the infection on to thousands of cattle.

Milk, to be absolutely safe for human consumption, should come from healthy, clean cows, it must be cleanly handled, and it must be pasteurized. Pasteurized milk is only safe milk.

Summer vacationists who are unable to obtain a regular supply of the commercially pasteurized product, should pasteurize their own milk. Methods of home pasteurization may be obtained by writing to the Health League of Canada, 111 Avenue Road, Toronto 5, Ontario.

### Young Drivers Cause Plenty Of Accidents

According to the Michigan Soo Evening News an interview with insurance and safety officials in one of the large cities uncovers the fact that one fatal accident for two million miles driven is the average driving group. For the ages 20 to 25, the average is one in eight million, while the more cautious 45 to 50 group has one fatality to every 21 million miles driven.

This is what insurance men say of the youngsters who take off in father's car nearly every evening, scattering destruction in their wake.

We have taught the children to drive, or they have learned by imitation. They have had an instinctive grasp of the mechanics of the operation. But there is much more than mechanics involved in driving a car. Courtesy, consideration, common sense and good judgment are even more important than driving ability as such. As driving as in other fields, it is character that counts.

Pasteur's germ theory of disease, established in the 1870s, led to identification of the causes of many major illnesses.

### Crown Prince Seeks Same Exile As Kaiser Wilhelm

It is remarkable how completely the Hohenzollerns have faded out of European history on the stage of which they made so imposing a figure over centuries.

The Kaiser, Wilhelm, last sovereign of the line, spent over 20 years a refugee exile at Doorn, where he took sanctuary under Dutch hospitality after his flight from Spree in November, 1918. He occupied his bearded life years living on the Doorn estate, and when the Nazi legions overran Holland, they carefully bypassed Doorn to spare him the humiliation of liberation. Hitler was taking no chances with royalty. Now comes the news that Crown Prince Wilhelm, 70, is seeking the same exile as Little Willie, is seeking the same exile, and has petitioned the Dutch Government to certify him as a non-enemy in order that he may take over the Doorn property.

Now his Silesian mines bring no more dividends, doubtless Little Willie seeks retirement. Will he be haunted by the shades of those Germans who under his command left their bones in front of Verdun?—London letter, Ottawa Journal.

### SUBSTITUTE OFFERING

Ancient Egyptians who could not afford a real pig for sacrificial purposes molded one in dough, baked it, and offered the pastry as a substitute.

Oslo, Norway, is the smallest city in the world which boasts a subway.

## Ottawa Expert Says Snow Is Mostly Air

It may be difficult to explain this to a skier who spends much of his time sitting on it, but snow isn't really snow—it's mostly air—says G. J. Klein, snow expert of the National Council.

Speaking at the meetings of the International Meteorological Conference at Toronto, Mr. Klein dealt with the cooling subject on a hot day when he presented the lowdown on the white stuff.

For instance he told the conference that in the Rockies when falling snow was 90 per cent air and even when hard-packed was still half air.

There were nine kinds of snow, judged by size and shape of grains, hardness and frozen water content, says Mr. Klein, writing in "Book in 1934." Canadian scientists became interested in the slippability of skin and sleigh runners. By 1940 they learned a lot; no one ever knew about snow—no one that is except the Eskimos.

"For example, Eskimos know that up North when it is very cold, the best sled runner is one that is very long and narrow, say 25 feet by 2½ inches. Tests showed that the front foot of two of the runners held the snow just enough to form a lubricant for its remaining length. In fact, the lower the temperatures are, the longer the runner should be."

Mr. Klein said the Meteorological Division in Ottawa is co-operating with the National Research Council in studying snow characteristics at stations from Gander, Labrador to Whitehorse, Yukon.

With specially-designed instruments designed to measure properties of penetrability of snow, hardness, thickness, depth, specific gravity, free water content, temperature and size and shape of grains and crystals.

### How Blueberry Pie Should Be Eaten

New York Herald Tribune Has Bright Idea

A wet summer made blueberries big, juicy and plentiful on upstate hillsides. Gathered mostly by small hands, mixed with a few leaves and twigs to be sorted out, the berries tumbled into pies and got promptly into trouble. A storekeeper, overall looking for blueberry pie arrived in Manhattan from a Catskill Mountain valley, far off a state highway. Two hot and bubbling blueberry pies had been taken from the oven by a farm housewife and placed on the counter for the screen—cool. Hearing a sour pie maker turned to see a young bear, attracted from near-by hemlocks by a sweet savor, pressing nose against the screen and regarding the pie with the interest of a hungry puppy. A scream sent the disappointed and undoubtedly good-natured bear to look for blueberries without crusts.

It is a bear, of course, who would longingly like to dig into a blueberry pie. For such a fresh baked pie, to be eaten at its best, should be eaten in a farm kitchen on red-checked table cloth. The consumer should have sleeves rolled up, a dish towel tucked under his chin, and a fork in hand, not a spoon, rather than a fork. The blueberry pie, with its delightful but too indelible stain is not for table damask nor for a plate whose circumference and circumference is a good plate is often just right and goes with the spoon needed to ladle up the juice.

A blueberry pie must not be tainted by lemon, cinnamon or the disgraced European jam. The speed record for eating a blueberry pie is 51 miles per hour. A couple of days previously an American jet plane had streaked through the sky at 623.8 miles per hour. What chance has a hard-working pigeon against competition like that?—Sault Ste. Marie Star.

### No Chance At All

Take the case of the bird that set a new speed record for homing pigeons at Coderch, Ontario. Where did it all-out effort get it? The speed record is not the only record. The speed record for a blueberry pie was 51 miles per hour. A couple of days previously an American jet plane had streaked through the sky at 623.8 miles per hour. What chance has a hard-working pigeon against competition like that?—Sault Ste. Marie Star.

### QUEER SITUATION

The Toronto Globe and Mail says Canada needs houses. Thousands of potential home-builders are ready to lay-each on the line to provide jobs at decent wages for tens of thousands of artisans. Only the cost sheet does not add up. The answer may be, the fact remains that home building is in the luxury market, today, at the time of the greatest demand and the widest need this country has known.

Grace Hill of Toronto, (left), saved 34 patients at convalescent home from possible death when gas heater exploded. Miss Hill broke open door locked, grabbed pipe to break open door amid escaping gas.

DOUBLE BOYCOTT RESULTED FROM U.K. TAX ON U.S. FILMS—British moviegoers are grieved over the news of a 75 per cent tax on all U.S. film earnings, which resulted in a boycott of Britain by Hollywood. British film fans are said to be particularly grieved over the prospect of missing "Forever Amber," starring Peggy Cummins, (left). British film magnate J. Arthur Rank and wife, who has had much success showing English films in U.S., might find it hard to get playing time for his productions because of present controversy.

### INDIA DOMINIONS TOOK OVER FROM BRITAIN WITH ABSOLUTE FREEDOM AND CONFIDENCE

London, June 10.—India and Pakistan started on their own course with no strings attached. Their absolute freedom to decide their future is contained in the Indian Independence Bill passed by the British parliament with the support of the Indian Congress.

British business men will remain in India, but all the vast possessions of the Crown, including defence installations, were vested in the Indian government long ago and will be shared by the new dominions.

The Dominion finances will be assisted by the asset of British sterling balances of more than £1,000,000,000 (£4,000,000,000), representing United Kingdom indebtedness in India, mainly for war expenditures. Negotiations on the sterling balances will be continued.

British business men will remain in India, but all the vast possessions of the Crown, including defence installations, were vested in the Indian government long ago and will be shared by the new dominions.

The Dominion finances will be assisted by the asset of British sterling balances of more than £1,000,000,000 (£4,000,000,000), representing United Kingdom indebtedness in India, mainly for war expenditures. Negotiations on the sterling balances will be continued.

As the ancient Moslem Mogul empire collapsed in the mid-18th century the British were the strongest, most alert successors and spread their power over all of what was known as undivided India with 200,000,000 people. Friendly compacts were reached with the independent Indian states where another 100,000,000 live.

Lord Listowel, last secretary of state for India, in giving his blessing to the new dominions said: "In history had no parallel for the voluntary decision of a great power to give freedom to 300,000,000 people."

Oppression already fading, most Indians said the British left good behind them. For more than 100 years Britain built an Indian civil service with a reputation for integrity and efficiency. British arms protected India from invasion, British finances built railways and dams, British police and soldiers suppressed

native societies and British teachers ended many savage customs. "Look at our policy in India and you will see that we never intended to stay forever," said a British official.

"Now the time has come to make the transfer to people eager and prepared to take over."

The Indians, Communists the last word on India—spoken by Prime Minister Attlee in closing debate on the Independence Bill—was "India can count on the utmost sympathy and help from the people of this island, help us without any slightest degree of patronage, all of us extend our warm friendship to the Indian peoples."

The size of the average farm in China is three and one-half acres,

### Editor Found Out What Reader Wanted

CLEVELAND.—The Cleveland Press takes weekly polls to determine what readers want. The latest quiz was "What would you do if you were editor?"

Letters poured in. Some good; others lambasting the paper. Most words of the lot was perhaps the shortest:

"I am."

"Mr. Editor:

"I was editor, I'd resign."

"Thanks,"

"John Q. Public."

— — — — —

The size of the average farm in China is three and one-half acres,

### Depends On Where Herring Is Caught

#### How Many Bones It Has In Its Spine

How many bones are there in the spine of a Pacific herring? It all depends on where you caught the herring. If it were out of the sea of San Diego, Calif., the number of vertebrae in the fish would be 50. If you netted the herring off the Alaskan coast the number would be 53, and the herrings of southern British Columbia get along nicely with an average count of 51 bones in their spines.

In brief—warm ocean means a low, and cold water a high vertebral count in Pacific herrings. Or, as scientists put it, the mean vertebral count is inversely proportional to temperature of water during the period when the eggs are spawned and developed.

All this means little or nothing to the layman, but Canadian and United States research workers with the welfare of the fishing industry at heart, conducted this herring bone count both by dissection and X-ray, for a special reason. Through it they have established the fact that the fishings of the Canadas, British Columbia and Alaskan cods tend to form local populations and migration and intermingling is so limited that the intensity of fishing activities in each area must be regulated to avoid local depletion of the runs.

In other words, conservation measures now can be undertaken with an increased scientific knowledge of the lowly herring.

### Good Motorist Will Make Efficient Pilot

MONTREAL.—Anyone who can drive a car can fly an airplane. That is the opinion of Gloria Large, blonde, 22-year-old Princess Edward Islander, who not only flies herself but is also a flight instructor. Miss Large, who arrived in Montreal recently from her hometown of Charlottetown, is one of five licensed women flying instructors in Canada.

When she was 15 she went to Los Angeles to learn to fly. Although a "natural" at that comparatively early age, she insists that good health is the only qualification necessary for a good pilot.

— — — — —

**REALLY AMAZING**

Playing to a house so crowded that the overflow audience filled the stage, Mischa Elman was roundly applauded, and at the conclusion of each number found a listener tugging at his coat tails and imploring "Please play again, Mr. Elman." Please play again, Mr. Elman, please play again.

At length, the artist offered the coveted selection as an encore.

Leaping to his feet and throwing his arms about the distinguished violinist, the gratified suppliant shouted, "Wonderful! Wonderful! It's just like on your record!"

#### BETTER THAN MEDICINE

Learn to laugh. A good laugh is better than medicine. When you smile on the face of a friend, it is fresh from the load it ordinarily carries. Learn to tell a helpful story. A well-told story is as wholesome and as welcome as a sunbeam in a sick room. Learn to keep your troubles to yourself and greet your friends with a smile. The world is too busy to linger over your ill and sorrow.

Colds are dangerous and in the case of children, the younger the child the more dangerous the cold.

To Feel Right—Eat Right!

## Eldorado Has Turned From Gold To Cheese

Eighty years since it was a bustling centre for bonanza seekers, Eldorado—"the golden place"—today is reaping wealth and prosperity producing yellow cheeses for world markets.

Where once grizzled prospectors sunk shafts and watched their golden dreams founder on "nuggets" of rose and white quartz, herds of cattle graze and wander over ore dumps and gold-bearing piles.

Today's villagers can tell you a thing or two about fine cheddar—but little of the southeastern Ontario district's past. They're even indifferent. School teacher Dick Thomas, teacher of the ways of the farm, but ignores mining.

Strange enough, letters still are received addressed to the Eldorado Iron Mines—the gold searchers found more iron than nuggets and seized on it as the "right stuff" to make it rich". But it, too, played out.

Gold? Who cares for it, when the iron-tinted Moira River carries away the soil? That's why farmers are planting more trees along its banks—to save their real wealth.

### Nascopie Was A Great Adventurer

No pomp and circumstance attended the sinking of the Nascopie to her last resting place in the lonely waters of the far north she had sailed so long. But no saga of Viking passing to Valhalla ever so immediately stirred the world.

Year after year, for 33 years, this little Hudson's Bay Company ship had plied her route on the waters of the St. Lawrence, glistening in the summer sun and has ploughed through fog and storm and fair weather to the icy wastes which border the Arctic, bringing isolated outposts their mail and supplies, with an average count of 51 bones in their spines.

In brief—warm ocean means a low, and cold water a high vertebral count in Pacific herrings. Or, as scientists put it, the mean vertebral count is inversely proportional to temperature of water during the period when the eggs are spawned and developed.

This means little or nothing to the layman, but Canadian and United States research workers with the welfare of the fishing industry at heart, conducted this herring bone count both by dissection and X-ray, for a special reason. Through it they have established the fact that the fishings of the Canadas, British Columbia and Alaskan cods tend to form local populations and migration and intermingling is so limited that the intensity of fishing activities in each area must be regulated to avoid local depletion of the runs.

In other words, conservation measures now can be undertaken with an increased scientific knowledge of the lowly herring.

It was taken by her crew, who had kept open so faithfully through the years. Such a one might have written of the thoughts of the Nascopie every thrust of her engine, carried her well and closer to the moment when the reason for her existence would be taken from her. In her slipping beneath the sea off Cape Dorset to become a permanent part of the North, it was destined to be again at familiar ports, such a one might see a merciful rescue from the knacker's yard.

It was kind of her. True to her tradition, she made no noise, taking none of her passengers or crew with her. In a humble way the Nascopie belongs to the ages, along with the Hudsons, the Franklins and other great-hearted adventurers—Toronto Evening Telegram.

### Birds Which Have Collecting Instinct

Magpies which abound in the Canadian Rocky Mountain region, Canada jays, and the juncos, jacks, etc., follow the same way from Nova Scotia to British Columbia, and cross far too abundant in widespread regions, are among the birds with a curious "collecting" instinct, hoarding all sorts of odds and ends in their nests.

Charles Broley, Canadian ornithologist, says Bald Eagles are keen collectors than any other species. In their lofty nests she has found such treasures as a rubber shoe, a ring, a 22-year-old Princess Edward Islander, who not only flies herself but is also a flight instructor. Miss Large, who arrived in Montreal recently from her hometown of Charlottetown, is one of five licensed women flying instructors in Canada.

When she was 15 she went to Los Angeles to learn to fly. Although a "natural" at that comparatively early age, she insists that good health is the only qualification necessary for a good pilot.

#### Montreal Is Very Imposing Metropolis

Montreal, as Canada's largest city, can list some imposing statistics to help prove its size. It has 600 miles of streets and 900 miles of sidewalks. It takes 600 men to remove garbage, 95 truck-trains and 90 tractor-trucks to keep streets open for traffic in winter. It takes 300 sweepers and 345 sweepers to keep streets clean in summer; the city has 76,482 buildings, worth \$1,261,313,400.

When picking up a hot dish use a thoroughly dry holder, as heat travels rapidly through moisture and it may be unsafe to use a wet cloth.

—Fitzpatrick in the St. Louis Post-Dispatch

# World News In Pictures

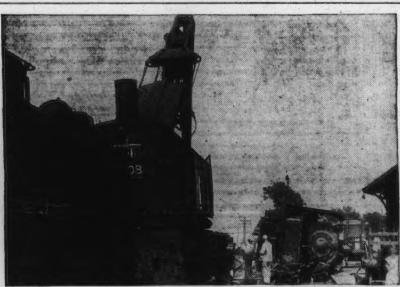

**INMATES JOIN FIREMEN FIGHTING REFORMATORY BLAZE** — Prisoners risked their lives to rescue 15 horses when fire completely gutted main stables at Ontario reformatory near Guelph. Entire hay crop was lost and Guelph firemen joined inmates battling the blaze, pictured here, for more than three hours.

**QUINTS MARK 4TH BIRTHDAY** — Nine years younger than Canada's Dionne quintuplets, the Diligenti quintuplets of Buenos Aires, Argentina, celebrated their fourth birthday in their luxurious home. Shown on the front steps, from top to bottom, they are: Franco Jr., Carlos Alberto, Maria Esther, Maria Cristina and Maria Fernanda.

**YEAR AFTER, BIKINI SHIPS ARE STILL "HOT"** — Year after the atomic bomb was exploded ships have to be checked for radioactivity. Bikini ships are still labelled "hot" by U.S. experts and 12 of them are under observation in navy yards. Here workers cross boundary line after a thorough scrubbing.

**WRECKED TRAIN SAWED IN HALF** — Work of clearing the wreckage caused at Kingston, Ont., station when the locomotive of the International Limited left the tracks is proceeding smoothly and efficiently. Workmen are shown here measuring off the distance of the engine before cutting in half.

**YEMEN'S ROYALTY** — Son of the King of Yemen, Prince Seif Al Islam Abdullah arrives at LaGuardia Field, N.Y., by plane from Cairo. The royal visitor is in the United States at the invitation of the government and hopes to establish trade relations between Yemen and U.S.

**SHOOTING STARS FOR THE NATIONAL GUARD** — Speedy new army air forces' Lockheed P-80B jet-propelled "Shooting Stars" like these will be delivered to the Air National Guard next spring for the training of reserve pilots. Eighty-six of these super-fighter planes, shown on the Lockheed test base at Van Nuys, Calif., will be furnished to the A.N.G. The P-80B has the greatest firepower of any jet fighter plane in the world. Six machine-guns in the nose fire 1,200 rounds a minute. A pilot-ejector seat, an air-conditioned pressurized cockpit are new features of the ship.

**CANDIDATES FOR LIFE-SAVERS** — Candidates for lifesaving jobs on Toronto beaches made vacant by strike of lifeguards, showed up on the shores of Lake Ontario. Jill Duff, Mimico, in charge of group of children, is shown demonstrating holds with Bob Grimshaw who hopes for job.

"Hairpin turn" elimination has been asked by Kingston citizens following wreck that led to death of engineer and fireman. Autopsy showed men died of suffocation and scalds. Master cranes are shown lifting undamaged pullman car to siding.

**FAWN IS CHILD'S PLAYMATE** — Playmate any child would covet is this fawn, being fed by Carol Olson of Dundas, Ont. The fleet little fellow shows no fear of Carol or of her dog, and the three romp together.

**VAL D'OR DENTIST PULLS TEETH ON FLY** — In a few weeks backwoodsmen, trappers, miners and other isolated persons in northwestern Quebec won't have to go to the dentist! He'll be coming to them. Dr. Nicolas Gouroff, veteran of two wars, and his pilot son, Peter Gouroff, 20, skinned over Hamilton bay in their "flying dental clinic" for Montreal, en route to Val d'Or. Peter, who received his license a year ago, spent 10 hours learning to fly with floats before flying his father back to his practice. "I have a good practice in Val d'Or," said the former Canadian Dental Corps major, "but a lot of people can't get to see a dentist and I'm going to look after them." On the doors below the dental emblem is lettered: "Flying Dentist, Val d'Or. Dr. N. Gouroff."

**POLICE AND VOLUNTEERS DO DUTY OF STRIKING TORONTO LIFEGUARDS** — Due to strike of lifeguards on Toronto beaches, police and volunteers helped maintain safety record. Here Constable I. C. Maciver (left), only patrolman at Centre Island, cautions Sandra Bell, 2½ years. Lifeguards say they will return to work at once if demands are met and score harbor commission for "callous attitude toward human life." Centre Island beach, (right), was jammed despite absence of protection. Several near-drownings were reported.

## OUR COMPLETE SHORT STORY

**Saturday Night**

By MARION BOUCHER

**PATSY** was worried. When one is sixteen, pert, blonde and definitely whistle bait and one hasn't a date on Saturday night, it's a serious matter. Worst of all was that she had been so sure Jim Ross would take her out. Hadn't he asked on the other day what she was doing on Saturday night? And when Patsy had answered evasively,

"There remains to be seen," she had said glibly, "what's keeping you then?"

It was as good as a date, and Patsy had been secretly triumphant over it. All the girls agreed that Jim was the smoothest boy in college, even though he did seem rather indifferent to their charms.

When her bosom friend, Lella, boasted that she had a date for Saturday night, Patsy said mysteriously that she was going to be "busy" too. Lella had been very curious, but Patsy had refused to say more.

On Saturday afternoon Patsy反射了 the window and combed her blonde curls. She then took leisurely bath and emerged from the tub, scented with salts, bath powder and her mother's most exotic cologne. She gave herself a manicure, using the bright nail polish Dad favored.

After a critical survey of her wardrobe, she decided that her new white skirt with the peasant blouse would do for the evening. She would wear her new sandals too, even though they weren't very comfortable.

And now it looked very much as if all Patsy's preparations had been for naught. Here it was seven o'clock and no word from Jim. Of course he worked Saturday afternoons at the store, so she knew he should be finished by now. Pat's hovering uneasiness around the telephone.

"Aren't you helping your mother with the dishes tonight?" Dad asked.

"Oh yes, sure," she answered and drifted reluctantly towards the kitchen.

When the phone rang a few minutes after, Patsy almost broke a leg in her haste to answer. But it was only for Bob, her older brother. He talked on and on while Patsy prayed for him to stop so she could try to call while the line was busy. Finally Bob hung up but the phone did not ring again.

"Would you like to go to the movies with Dad and me?" her mother asked, apparently unaware of Patsy's anxiety.

"I don't think so, Mother. I don't feel like going to a show tonight."

"You're not sick, are you Patsy? I noticed you ate very little supper."

"Oh, no, Mother, I am feeling fine." "Are you going out?" "Well... I might later on."

BUSINESS OPPORTUNITY  
Plastic Ornaments

Complete and up-to-date book of instruction by a Professional; with twenty-five pages of illustrations showing how to make ornaments for home, office, gift shop, etc. Items ready for sale in gift and novelty shops everywhere. We supply you with all the materials needed. Price \$10 today for instruction book with all particulars. KINGSMAY ART STUDIO, 1515 Kingsway, Art Studio, Vancouver, B.C.

NO BUTTER  
NEEDED  
INSIDE OR  
OUTSIDEMAGIC  
CHEESE BISCUITS

1 1/2 cups flour 1 tbspn. shortening  
1/2 tspn. salt 6 tbsps. grated cheese  
2 tbsps. Magic Baking Powder (When half-baked, place squares of cheese between biscuits for extra flavor)

Soft dry ingredients together; cut in shortening until crumbly. Add water, add milk slowly. Roll out on floured board to 1/4-inch thickness. Cut into squares. Bake in oven at 425° for 10 to 15 minutes. Makes 12.

CANADA

"Remember to be home by twelve if you, dear."

"Oh, Mother, that Cinderella stuff this day and age! Besides, it's Saturday night."

But her mother was adamant. It was on special occasions that Patsy was allowed to stay out later than twelve in spite of her vehement protests over this rule.

After her parents had left, Patsy went upstairs and changed into the white skirt and gay blouse. She combed her hair again. She could hear Bob splashing and whistling in the bathroom, and soon he went out too. The house was madinely quiet—if only the phone would ring!

Patsy dressed adlessly down stairs and turned on the radio. Dance music filled the room, and then a girl's voice mocked her:

"Saturday night is the loneliest night in the week..." Patsy shut off the radio.

She looked anxiously at the clock—it was after eight now. What would she do all evening, if Jim didn't call? She didn't dare phone Lella—it would be too humiliating to confess that she was sitting at home alone. Besides, Lella had said she was going roller-skating with Davy Low.

Patsy picked up a magazine but found that she couldn't concentrate on what was reading. She tossed it aside and went to the window. Couples strolled by, talking and laughing in the June night. It was almost more than she could bear—everyone seemed to be having a good time, except herself.

It was Jim's fault, Patsy thought bitterly. Look at her brother—Bob—he didn't have to wait for anyone to ask him out. But she was a girl and had to accept her fate. Oh, it wasn't fair!

Patsy was on the verge of tears when the doorbell rang. She leaped up. Could it be...? Yes... it was Jim!

"Hi, Pat!" He was a little out of breath. "I was afraid you wouldn't be home. There was a two-for-one sale at the store and I had to work late this evening—couldn't get around any sooner. How about going to a show?"

"I really didn't care to go out tonight, Jim." She succeeded in sounding very indifferent. "But... well... yes... a walk would be fine."

"Sorry I didn't phone you, but the bus wouldn't let me, we were so busy."

Patsy hummed a little tune as she went for her coat. All was right with the world once more: it was Saturday night and she had date!

SELECTED  
RECIPES

## DEVIL'S FOOD CAKE

(2 eggs or 3 egg yolks)  
2 cups sifted flour, 1 cup sugar  
1/2 teaspoon soda  
1/4 teaspoon salt  
1/2 cup butter or other shortening

1 1/2 cups sugar  
2 eggs or 3 egg yolks, unbeaten  
2 1/2 squares unsweetened chocolate, melted

1/2 cup milk  
1 teaspoon vanilla

Beat four once, measure, add soda and salt and stir together twice times. Cream butter and sugar gradually, and cream together until light and fluffy. Add eggs one at a time, beating well after each addition. Add chocolate, blend, then alternately with milk, a small amount at a time, beating after each addition until smooth. Add vanilla. Bake in two greased 8-inch layer pans or three greased 8-inch layer pans in moderate oven (350 deg. F.) 25 minutes or until done. Spread frosting. Sprinkle Frosting or Mint Frosting between layers and on top and sides of cake.

CHOCOLATE CRISPET  
CUSTARD PIE

Pastry  
4 eggs, slightly beaten

## CADETS AND MOVIE STARS

A group of young British air force cadets touring Canada got an unexpected thrill on a visit to the Banff Springs Hotel when they met Joan Leslie and James Craig, Hollywood movie stars, who are making a picture at Banff. Here they are seen on the banks of the Bow River with the two stars.—C.P.R. photo.

## BRITAIN MUST TAKE IT

News of the further austerity proposals of the British government must make sober reading in this country, where we are literally flowing with milk and honey. There can be no doubt that the British people are faced with one of the most critical periods in their long history. If they can get by the next eight to twelve months without doing serious harm to their services and industries and to the moral of the people, they may have things a little easier but the immediate prospect for any relief is very dim.

Britain is short of almost every commodity, including manpower; her one hope for increased production. She is desperately short of U. S. dollars and credit with which to purchase the necessary commodities to alleviate the situation. This is not something that happened to Britain in the space of one short year. It is the result of an all out effort by the British people in waging a total war.

Britain can no longer fall back on the output of her heavy industries, her chief markets on the continent are as bad off financially as she is herself. Then too, long periods of heavy drain on the resources of the industries have left them with old worn out equipment and they cannot now be expected to contribute much in the way of additional production.

The history of England is claimed to have no parallel to the present condition. We seem to remember a period in the middle ages during the industrial revolution some similar parallel in the economics of the mother country of course the balance of foreign trade was then not so high. Britain came through that crisis, we think she can do it again.

## WATER UNDER THE BRIDGE

Time is a fleeting thing but when one looks back to a day in September, 1939 — September 10th, 1939 — one wonders how time can bear meaning when the fruits of six years of brutal war already seem to be forgotten in the minds of men.

On September 10th, 1939, Canada officially became at war with Germany a war which ended 6 years later.

Eight years have passed since that eventful day, a council of nations has been formed; yet we seem no nearer to that dream of permanent peace than we as Canadians were on the eve of the day on which we became at war.

The tides and fortunes of men run slowly as the water in a peaceful brook runs under a shaded bridge. Spring brings a feeling of strength and power to the stream and it turns into a raging torrent; so, with men, time changes, new ideals grow and soon the thirst for power and glory becomes the predominant goal of a race or people and then comes the flood. With the flood comes fortune, famine, starvation, pestilence, disease and want.

Time marches on and neither the fears, fortunes nor favors of man can change the course of destiny.

## NOT WANTED

In the issue of September 4th of the Innisfail Province, that paper carries an account of an attempt made by the Hutterites to purchase an area in the Raven district in order to set up another Hutterite Colony. After the story had been released the solicitor for the Hutterites had advised the "Province" that the plan had been abandoned.

This story carried by the "Province" is we believe the first full account of the Raven plan. In a vigorous editorial, Mr. Ben Huckle, editor of the "Province", decried the establishment of such a colony in the Innisfail district. We here in Olds may well sit up and take notice for if a Hutterite colony had been set up in the Raven area it would have some effect on the district in which we live.

We in this country can and do tolerate men of all races, creeds, and colors but today with our new status of citizenship we do not think that it should be made possible for any group such as the Hutterites to enjoy all the benefits of this country without being required or expected to take up arms to defend those freedoms which they enjoy.

The Hutterites have been confined in their activities by recent legislation by the Alberta Government but despite this they are allowed to live in their colonies, protected in citizenship without giving protection. They can never be expected to take their full place as citizens of this Dominion and to take their place among men until they come out from behind their cloaks and show some willingness to take on the responsibilities of a citizen.

The abandonment of the Raven project speaks well for the citizens of that district who protested so vigorously against the coming of the Hutterites to their midst.

## WE DON'T AGREE

We feel that we must take sharp issue with the proponents of the theory that the Dominion Treasury should compensate the farmers for difference between the world price of wheat and the present guaranteed price. It is our strong contention that the people of Canada will be called upon to pay for the wheat sent to Britain in the future just as we have paid for commodities purchased by Britain during the war. The only way the extra payment can be made by Canada is by more and higher personal taxes and the white collar man still insists that he is paying enough as do most of the farmers. The alternative is to put the Canadian wheat on the floor of the exchanges of the world then sit back and watch the prices go down in a dismal trend of rising costs of basic

## Let's Chat Awhile

Recently I took a very enjoyable trip to the east. Met old friends, visited many places and generally making had a very happy and restful time.

I made the journey by railway train and like most of the other passengers took every opportunity to do the rounds of the various stations at which we stopped for train servicing.

As soon as the train had stopped, engine men and workers quickly went to work greasing, cleaning, wheel tapping, brake testing. While this was going on I walked toward the front end of the train and watched the changing of the engine.

My! what monsters of railway engines there are today. What a difference between this — the latest mechanical achievement — and the first engine which was built a hundred years ago. I had the opportunity to make comparison for only a few hours before I had to get off in front of a railway engine. No, not the engine that stands in front of the C. P. R. station in Winnipeg. Without a doubt the years have seen progress, but throughout the same years the principles have remained the same. Fire, water, oil. Without the fire and water, no steam, without the oil, no continuous service. Without the track, no arriving.

As I sat there, however, my mind began to make comparisons between the engine and our daily lives.

Without the fire of desire, we lack energy and power. It is the Christian who is a success. It is the Christian who has the fire of the Holy Ghost in his life that is successful in following God.

Without the oil of kindness and patience we soon become worn by the friction of life and quickly become misfits. Oil lessens the friction and prolongs usefulness. The oil of kindness is what a lot of us need. It should be obtained by just being kind. Say kind words, think kind thoughts and life would have a new meaning for many.

"Kind words can never die, cherished in the heart, till the last breath."

God knows how deep they lie stored in the breast.

Like childhood simple rhymes, said over a thousand times — And all hours and climes, distant and near.

Kind words can never die, no, never die.

Read Hebrews 13: 20-21.

Tracks — the guides or the rules for living, jump them, disaster. Follow them and you will have power with minimum restraint. The laws of God are the railway tracks of life — jump them at your own risk and the endangering of others.

We must follow the rules in order to get to the destination — Eternity.

—E. L. G.

New Bonds Coming

The decision to offer a second series of Canada Savings Bonds, forecast some time ago, has been confirmed by Hon. Hugh Abbott, Minister of Finance. The new issue goes on sale on October 14th.

The Minister of Finance stated that the second series of Canada Savings Bonds will be dated November 1st, 1947.

## Radiators Limited

Calgary - Lethbridge - Red Deer

Radiators for all makes of cars, trucks tractors, and industrial engines. Genuine factory replacements of your original radiator.

"Desire to Serve - Plus Ability"

NOW BETTER THAN EVER!

See the Great New  
**FORD TRACTOR!**

...WITH HYDRAULIC TOUCH CONTROL OF IMPLEMENTS

It's here! ... the new Ford Tractor that's better in every way! It combines the advantages for which Ford Tractors are already famous, plus 22 important new features to give you easier, faster farming. The Ford-improved Hydraulic Touch Control, for example, provides a smooth, positive control of implements, assures positive penetration and constant control of depth. The new transmission with an added fourth forward speed steps up top speed for road travel and field work. You save gas by selecting the most economical speed for the job. Shifting is easier, quieter.

See also the new line of Dearborn quick-to-hitch basic implements specially designed for the Ford Tractor. They take full advantage of the Ford-improved Hydraulic Touch Control.

Come and let us demonstrate.

## 22 New Features

- New transmission - + + 4 forward speeds
- New hinged radiator grille
- Ford-improved Hydraulic Touch Control of implements
- New Duo-servo brakes —pedal for both brakes of right side. Give faster stops, sharper turns.
- New long-lived water pump that's simple to service
- Swing-back seat and long wide step plates for less operator fatigue
- And many other new, practical features

Come and see the New Ford Tractor and learn about the Dearborn quick-to-hitch farm implements.

**THE NEW FORD TRACTOR WILL BE ON DISPLAY**
